THURSDAY, DECEMBER 9, 2004, 9:00 A.M.

////////

1.0

MS. WILLIAMS: We're going to kick this off. First of all, I am Lori Williams, and I'm the General Manager. I have the privilege of being the General Manager of the Truckee Meadows Water Authority, and I'm delighted to have you all here and all of you interested in participating in working with us on the Truckee River Fund.

A little bit of history, and a couple of introductions. First of all, back at Sierra Pacific, and I actually had the pleasure of working with Janet Carson at Sierra Pacific, we had a little more freedom as far as projects and where money went and things like that. And now that we have become a public agency, there hasn't been as much opportunity for us to really meet some of the needs that we used to meet on the Truckee River.

And some of our board members, in particular Dave Aiazzi, thought that there might be an opportunity, since the river is the backbone of the Truckee Meadows Water Authority, it's where 85 percent

of our water comes from on an annual basis, and we really have to be the stewards of the Truckee River, everything that touches the Truckee River has a potential to impact us.

2.1

So the Board, last spring, looked at the idea of setting aside some funds to basically look at projects on the river that could enhance the water quality in the river and protect the watershed in the Truckee River basin, and thereby having a positive impact for TMWA and for TMWA's customers.

So that's a little background. They set aside last year in the annual budget about \$340,000; they have worked through some issues related to what the agreement, where the funds might be; they have looked at options for setting up the fund, and came up with the conclusion that the best way right now, and the most expeditious way, would be to set up the fund through the Community Foundation, who already has an umbrella to do these things.

There would be opportunities to bring in other funds into that, that could also be used for Truckee River projects; and they have asked all of you wonderful people to help us decide how to prioritize, spend that money; and that's really what this kick-off

meeting is about today.

So in my mind, it's this committee, this advisory group, that is going to be recommending to the Board how we would spend that money.

Now the anticipation is that each year in the next couple years that that fund would be incremented up as we get our feet on the floor, and you guys figure out some real projects that we want to participate in that the Board has kind of, at least, blessed the concept that that fund would be increased over the next couple of years.

We have assigned Ron Penrose, and many of you have worked with Ron, as our Staff Facilitator, if you will. It's not really the intention of TMWA that we would intervene in your work, but we want to make sure that we provide you whatever staff support we can.

Ron, behind him, has the whole TMWA organization. So if there is information that needs to go out, TMWA can do all that kind of work for you, if there is information that needs copied, all of those kind of things. So we're kind of just here to serve you as advisers, and then your role is to recommend to our Board things that would be funded

with this money.

2.0

Sylvia Harrison is the other person I would like to introduce. Sylvia is our general counsel at TMWA. She's been involved in the development of this concept, and she's also been involved in some concerns that were raised by the County Commissioners that TMWA is forming a charitable foundation, and what that might mean, and whether that is within the purview of the TMWA Board. So I will leave it to her to discuss that.

And you don't want to sit here and listen to me babble. So with that, I want to thank you for being here.

I will probably have to step out after the meeting starts getting underway, and I will leave it to Ron's capable hands here.

Ron has done projects up and down the river, the State River Map, the Glendale Leer Project, projects associated with the watershed, so he's a river guy just like many of you are, so he will be a great hand at this.

Any questions for me? Well, thanks again; and thanks, Dave; and thanks to the UNR folks in the back who actually have their first idea for a proposal

```
on the table. Anyway, they are here, and I welcome them to participate in this process too. Thanks.

MR. RON PENROSE: Thanks, Lori. We've
```

2.0

provided you with a copy of the agenda. The first item on there is the approval of the agenda, so I guess we will throw that out there to the committee. Does anybody have any comments about the agenda or any recommended changes or items they wanted to discuss at this first kick-off meeting?

MS. SUSAN LYNN: If I might suggest that the selection of the chairman be put towards the end of the meeting after we've all had a chance to get acquainted?

MS. SYLVIA HARRISON: That's fine.

MR. PENROSE: I think that's a good comment. Any other comments?

MR. MICHAEL CAMERON: On Item 7, you have as the second part there, discussion concerning activities of Committee pending outcome of the opinion. I think 7 and 8 kind of blend together a little bit, and I think it would be really helpful for us to have a discussion on the agreement and what the parameters of the group are, so we can understand a little bit. I'm not asking for a change in the

```
agenda, necessarily, but just that I think the
1
     discussion on 7 will be aided by the presentation in
2
3
     8.
                MR. PENROSE: Okay. Sylvia will get into
4
5
     that.
                MS. LORI WILLIAMS: The other thing I'd
 6
     like to point out is we do have a Court Reporter here.
7
     When we have formed some other committees there have
8
     been questions, concerns, so it's kind of up to this
9
10
     group to decide whether or not you would like a Court
     Reporter taking minutes, or whether you would like
11
     some other form of minutes. So that's open for
12
     discussion.
13
14
```

This is the absolute most accurate minutes we're going to get, so we have started on that front, and the group is perfectly welcome to decide.

15

16

17

18

19

20

21

22

23

24

The advantage of the Court Reporter, I will point out, is that we have a complete record, and if the Board members or the public would like to look at the complete record, then it's obviously available for them. Thank you, Randi, for joining us.

MR. RON PENROSE: Approval of the minutes, of course there aren't any.

MS. SYLVIA HARRISON: We actually have an

```
action item on the approval of the agenda. We're
1
     going to make you guys do motions and seconds and all
     of that for even small things like approval of the
 3
     agenda, so if we could we have a motion and a second
 4
     on the approval of the agenda, so you get practice.
 5
                MR. BILL BRADLEY: I would move that we
 6
     approve the agenda with the concluding comments made
 7
     by the committee members.
 8
                MS. SUSAN LYNN: Second it.
                MS. SYLVIA HARRISON: We don't have a
10
11
     Chairman to decide, so I'd just ask: All in favor?
12
                 (They all say aye.)
                MR. RON PENROSE: I am a novice at this
13
14
     too, so I will be corrected as we move.
1.5
                Item Number 2, Approval of the Minutes.
     And of course we have none, since this is our first
16
17
     meeting.
                So we will move onto Item Number 3, Public
18
19
     Comment.
20
                MS. SYLVIA HARRISON:
                                      May I make a
     suggestion on that one? I'd request we have latitude
21
22
     to defer that. I know that there are members of the
23
     public here that would like to speak and make
     presentation about some ideas, but maybe to frame that
24
```

we ought to go to some of the other items about the function of the Advisory Committee and so on first, if that's okay with you.

That would bring us to the introduction of the Committee Members.

MR. RON PENROSE: Yes, let's do an introduction of the Committee Members.

I'll start with myself, Ron Penrose. I have been with TMWA, and also the Water Division,
Sierra Pacific Power Company, for probably approaching
30 years, various positions, responsibilities within the engineering and operations groups.

I've been involved with water treatment, river issues; so I have done quite a few things. And my goal here with working with you is to help you, if you need support, some help in certain areas, I am here to find that for you.

This is your committee, you're going to make the recommendations to the Board, but we'll help you with that process, so that's how I see my role in working with you.

MS. SYLVIA HARRISON: As Lori mentioned, I am commonly called General Counsel for the Water Authority, Sylvia Harrison.

I actually am a partner of the McDonald,

Carano law firm, and do have some other clients, but

sometimes I wonder. TMWA provides me with very very

interesting things to work on, most of which don't

have solutions, but this is just one of them. So I am

delighted to be here.

We can discuss later on in the meeting whether you feel the need to have legal counsel present at your meetings. We're happy to be here. We have a number of attorneys who assist TMWA in that regard. Of course we have Bill, so you can make up your mind whether you want to have counsel present or not.

Generally we serve only really in the function to make sure that whatever you are embarking on is consistent with the charter, I guess the requirements of the fund agreement, and also to make sure that you don't stray too far from the requirements of the Open Meeting Law.

And we can reserve a discussion of the Open Meeting Law for just a minute, and go the rest of the way around the table.

MR. CHRIS COBB: I am Chris Cobb, and I'm an engineer with the Public Works Department, City of

```
1
     Sparks, and been there since 2000, working with Pete
 2
     Etchart and Wayne Sayal, and capital improvement
     projects, and I look forward to being a part of this
 3
 4
     committee.
 5
                MR. CRAIG GODBOUT: Good morning. Craig
 6
               I've been doing civil engineering and
 7
     land-use planning work about 25 years. I've been a
 8
     Truckee Meadows resident for 12 years. I have worked
     for several engineering firms. I work for a small one
 9
10
     now, about to go to a very large one.
11
                I'm about to graduate from the Department
12
     of Resource Economics at UNR, with a degree in
13
     Environmental Policy Analysis.
14
                I am a Board Member of the Nevada Wildlife
15
     Federation.
16
                And my seat becomes active in January for
     the Board of Supervisors in the Washoe/Storey
17
18
     conservation district.
19
                And I'm looking forward to this.
                                                   I think
20
     this is going to be an interesting and rewarding
21
     experience.
22
                MR. MICHAEL CAMERON:
                                       Craig, which
23
     jurisdiction are you representing?
24
                MR. CRAIG GODBOUT: Washoe -- Well, no, I
```

```
1
     am actually representing the City of Sparks.
2
                MR. TOM SWAN: I'm Tom Swan, and I work for
 3
     the City of Sparks; I work for the sewer plant,
     Truckee Meadows Water Reclamation Facility, I'm a lab
 4
 5
     person.
                I've been working with the sewer plant for
 6
7
     25 years. And along with analyzing poop water, I am
 8
     intimately also involved with the river and monitoring
     and modeling of the river, so I have been involved
 9
10
     with the program for a long time.
                My boss, Wayne Fidell, asked, was looking
11
     for volunteers to be part of this, and I thought it
12
     would be right up my alley, and I am looking very
13
14
     forward to working with the group.
15
                MS. JANET CARSON: Are you at Sparks, also?
16
                MR. TOM SWAN: Yes.
17
                MS. JANET CARSON: How many seats, and from
18
     what jurisdictions are there?
19
                MS. SYLVIA HARRISON:
                                      Three from each.
20
     Three from Reno, three from Sparks, three from Washoe
21
     County.
22
                MR. JERRY PURDY: My name's Jerry Purdy.
23
     I'm a retired Highway Engineer with the Federal
```

Highways. Worked out of Carson in the '60s and the

24

'80s. It's pretty obsolete, but I was involved in environmental issues, pretty much air and water when it was the Federal Highways, they passed out the different functions, and in those days the laws just came about so you could carry the laws around in your pocket, if you had enough pockets, and you were a walking environmental authority.

2.1

But then I ended up getting involved in a committee down in Alpine County that lasted five years fighting L.A. Water & Power down in the Owens Valley in the groundwater pumping, and got kind of involved in that.

So I was interested in the groundwater issues up here in Washoe County, because water is pretty much repetitive, I've found. It's like watching an old movie: If you catch a couple of scenes, you know exactly how it's going to play out.

And then the Federal Highways used to supply manpower to FEMA to go out and do flood damage surveys and so forth, because in those days FEMA wasn't big enough to have a staff of people to go out and have it declared a disaster.

And I don't know how it worked out, but I ended up working most of the floods since the '60s up

```
1
     to, I guess, '84, and most of that was in connection
 2
     with doing damage surveys and trying to figure out
 3
     what the hell went wrong with why areas were flooded
     two and three times, and that sort of thing.
 4
 5
                 And that's kind of it. I've got some real
 6
     gaps, so I'm pretty obsolete between when I left in
 7
     the '60s; and as we're sitting here today, the world
     has kind of passed by. So I don't know what I can
 8
     contribute, exactly, but that's where it's at.
 9
10
                MS. LORI WILLIAMS: Jerry, do you represent
11
     the County or the City of Reno?
12
                MR. JERRY PURDY: Well, I'm kind of a
     Senior Citizen, Retired Engineer. Just citizen.
13
14
                MS. LORI WILLIAMS: The County? Ron, is
15
     that the County? Just so everybody knows.
16
                MR. JERRY PURDY: I was appointed by
     somebody, and I'm not real sure if it was a County
17
18
     man.
19
                MR. RON PENROSE: I have the list.
                                                     Jerry
     is with the County, the County Designated Rep.
20
21
                MR. MICHAEL CAMERON: I am Michael Cameron.
22
     I'm the Truckee River Project Director of Nature
23
     Conservatives of Nevada, located here in Reno, and
```

have been working on the river for the past five

24

years. Most of that effort going into a restoration project downstream, which is a project that the City of Reno and Sparks and, to a lesser degree, Washoe County, have made possible.

2.1

We will have water quality benefits in terms of the kind of mission of this body. The nature conservatives also working on land acquisition in the upper watershed, which I also think will tie into and is in the same direction as the kind of projects that will be funded here.

And also I've been very active in the flood control project for the past 157 years -- I mean seven years. Well, I've been involved actually since the day I got here.

Anyway, that obviously is a project that I think will have a lot of relevance to the things we talk about here, because it can have so much impact on the whole watershed.

Lastly, I had the pleasure of taking Susan Lynn's seat on the Regional Water Planning Commission as of last July. So those are my activities on the river.

I think this fund is a great development. I want to thank TMWA, the TMWA Board Members for making it possible. I think we can do some great things for the river.

2.0

2.2

So I am here representing the City of Reno.

MR. RON PENROSE: Michael is also very active with our working group; thus providing input and a lot of advice on our Glendale Water Treatment Plant, diversion/reconstruction project, and he's been very helpful with that process.

MS. JANET CARSON: I'm Janet Carson, and I have, I think, maybe three hats that I wear here. I was with the Water Department of Sierra Pacific for many years, negotiating the Truckee River Operating Agreement, so I have got a lot of familiarity with reservoir operations, river operations, stakeholders on the river, and some of the issues that drive the flow, regime that the river sees.

And my second hat is what I currently do, which is I head up a project to build a recreational trail along the entire length of the Truckee River.

I think that to the extent that the public sees the river, enjoys the river, they will take better care of the river. That will be something I will probably be trying to say a few times.

In connection with both of those things,

and you may want to do this in the spring, every year I offer a two-day field course on the Truckee River through the Nevada Water Resources Association. And it's designed as a continuing education credit, but we tour the river from Tahoe to Pyramid and talk about reservoir operations, environmental issues, legal issues, fish spawning.

1.5

2.0

2.2

It's a great trip, and may be something this Board wants to do. It's always in the spring, because then we get to see the fish spawning in a hand's-on way, so it's pretty fun.

Then the third hat that I wear, I bring to this, is having been on both the receiving end and the giving end of funding operations. I sit on a selection committee for the United Way, which we need to decide among many proposals who to fund, and I think that will be helpful in this process.

MS. SUSAN LYNN: I am Susan Lynn. My first hat is with Public Resource Associates here in Reno.

Second hat, which is kind of over and Michael has taken over, is the Regional Water Planning Commission.

The third hat is the Truckee River Yacht Club, which has been a river advocate for many years

in the community. Fifteen now, I can say. 1 The fourth is the Community Flood 2 3 Coalition. And my stint with the Nevada Commission on 4 tourism, I was the grants coordinator, so I have some 5 experience of budgeting and allocating funding. 6 So, anyway, I am looking forward to this 7 effort, and I thank everybody who got it off the 8 9 ground. Thanks. MR. BILL BRADLEY: My name's Bill Bradley, 10 I'm a life-long Nevada resident, born in Reno, and 11 enjoyed the river ever since I was young. 12 I am an attorney with Bradley, Drendel & 13 Jeanney, and I've been there for 23 years. 14 I was the Chairman of the Nevada Wildlife, 15 Board of Wildlife Commissioners, overseeing the policy 16 17 for the Division of Wildlife. 18 I am still a current member, winding down my tenth and final year, I believe. And in that role, 19 I have been active in overseeing grant projects 2.0 through an endowment that was created through the 2.1 Nevada Department of Wildlife. 22 Also in the charitable arena, I'm one of 23 the trustees of the Cord Foundation, and I believe I 24

```
was appointed by the City Council to serve as a
1
     representative for them on this committee.
2
                MR. RON PENROSE: Very good.
3
                MS. LORI WILLIAMS: Do you want to do
4
     introductions along the back?
5
                MR. RON PENROSE:
                                 Dave?
6
                MR. DAVE AIAZZI: Dave Aiazzi, Board Member
7
     of TMWA.
8
                MS. LORI WILLIAMS: And champion of this
9
     project. He has really worked very closely with staff
10
     to help get this going, and we appreciate his efforts.
11
                MS. JEAN CARNON: I'm Jean Carnon, and I'm
12
     Director Development of Public Relations for the
13
     College of Agriculture and Natural Resources at the
14
     University of Nevada, Reno.
1.5
                MR. CALOPY: I'm Mike Calopy, I'm the
16
     Department head of the Department of Natural Resources
17
     and Environmental Science at UNR, and also the Interim
18
     Executive Director of UNR's new Academy for the
19
20
     Environment.
                MS. RANDI WALKER: I'm Randi Lee Walker,
2.1
22
     and I'm your Court Reporter for today.
                MR. RON PENROSE:
                                  Thanks, Randi.
2.3
                We're going to move on with the agenda, and
24
```

we have Sylvia to provide a presentation on the general requirements of the Open Meeting Law.

1.0

1.5

MS. SYLVIA HARRISON: Well, the bad news is that since you are an Advisory Committee for the board of a public agency, you're subject to the Open Meeting Law; and we're getting pretty good at this.

MS. LORI WILLIAMS: Three years ago we were not good at this, believe me, but we've come a long way.

MS. SYLVIA HARRISON: Have any of you served on a committee or a group that's subject to the Open Meeting Law?

MS. LORI WILLIAMS: The Regional Water Planning Commission.

MS. SYLVIA HARRISON: The main thing that we need to be sure of, is make sure that you understand that these meetings need to be noticed to the public, and TMWA staff will continue to do that, run that function for you, unless you want some other arrangement.

The notice has to go out three working days prior to the actual meeting. An agenda has to be posted with that meeting indicating whatever action items you will be considering at that meeting. And

the tough part is that you cannot stray too far from the agenda, you cannot deliberate or take action on items that are not properly agendized.

2.0

2.1

2.2

As I said, we can take care of the postings. The tricky part is making sure that we can properly formulate the agenda so that you can take care of the business that you need to take care of, and are not too constrained by the agenda; but on the other hand, the general public is fairly noticed of what you're going to be talking about. That's always the tricky part of following these agendas.

The Open Meeting Law also requires that the meeting be recorded, or minutes be kept. You have your choice of taperecording, Court Reporting, and again it's up to you how you want to handle that.

The Court Reporter is a very thorough way to do it, and painless for you because you don't have to think about it very much.

Then we have to, of course, keep the minutes, preserve the minutes, and approve the minutes at subsequent meetings.

We also have to allow public comment. And there are requirements in the statute about how quorums are considered and so on. Since you are not

elected, then a quorum will consist of a majority, unless you decide to set up different rules for yourselves, which you're free to do, and a vote will consist of the majority of the members present for an action item.

1.0

2.2

2.3

I had my secretary copy Chapter 241 for you, which is only a few pages long, but I didn't tell her not to copy the annotations. So you have a very very thick packet at your disposal here, and if you want to read each of these little annotations about every single one of the 542 billion cases that have arisen under the Open Meeting Law, you're free to do that.

Otherwise, just ferret through this, look at the bold print, if you want to, but this is the document that will govern the conduct of the meetings as far as compliance with the Open Meeting Law.

And, again, TMWA is perfectly happy to have counsel with us, to make sure the agendas are properly noticed.

One of the other tricks about the agendas is that you do have to actually make the action item detailed enough so that members of the public can really figure out what you're doing.

It's probably not adequate to put down 1 Discussion of Possible Projects, in the future. 2 MS. LORI WILLIAMS: Are there limits about 3 this group convening in smaller quorums? 4 MS. SYLVIA HARRISON: Oh, thank you. Yes, 5 that was the other thing I meant to mention. 6 The other thing that the Open Meeting Law 7 requires, and this will also be a trick for those of 8 you who have not served on a Board such as this, is 9 that you cannot deliberate in small groups or pull 10 each other outside of the open meeting. 11 So it is legal for you to meet and confer 12 or have a subcommittee smaller than a quorum and 13 discuss something, but then that group cannot turn 14 around and go to another subset of you and deliberate 15 16 in that fashion. So it would be improper, for example, for 17 your Chairman to call up all of you and say: Well, 18 what do you think about this? 19 So that's one of the things that's a little 20 tricky. So all of your deliberations have to actually 21 occur in the open meeting, which may mean you have to 22 meet a little more often than you want to, otherwise. 23

24

MS. LORI WILLIAMS: So you can provide

information to each other, but you cannot deliberate 1 about the information? 2 Yes. MS. SYLVIA HARRISON: 3 MR. DAVE AIAZZI: You mentioned the word 4 "subcommittee." As elected officials, we're told if 5 we form a subcommittee, say of the City Council, that 6 subcommittee also has to follow the Open Meeting Law. 7 You can meet informally, but if you 8 actually call it a subcommittee, that subcommittee 9 also follows the Open Meeting Law. Does that apply to 10 non-elected officials also? 11 MS. SYLVIA HARRISON: Yes. 12 MS. JANET CARSON: Can we talk to each 13 other individually outside of the meeting? 14 MS. SYLVIA HARRISON: Of course. The 15 problem would be, or you might get into trouble if you 16 talk to Mike about something that is within the 17 purview of this group, and then Mike turns around and 18 talks to Jerry about the same thing, and then Jerry 19 turns around and talks to Tom about the same thing, 20 21 and Tom talks to Craig. MS. LORI WILLIAMS: Not merely the passage 2.2 of information, though, not talking in an 23 informational way; talking in a bodine-action, 24

deliberating way.

2.2

MS. SYLVIA HARRISON: In a way that leads you to a decision, ultimately. And you will see that the cases about what constitutes deliberating are very broad, so just about anything you talk about with respect to a possible action will be deliberating.

MR. DAVE AIAZZI: The way it was told to me is very easy: You have nine members, so five is a quorum, which means you can only talk to less than a quorum. So everybody has to keep track of their own, who they talk to, about any one issue; you can talk to three other people.

If you talk to Michael, then he can only talk to two other people. So you can't talk to more than a quorum about one thing. That's the safest way to do it.

So you sort of have to keep your own track of who you have talked to about each issue, and say:
You know what? I can't talk to you about that, because I've already hit my quota of three.

There has been a lot of different interpretations, but that's a good way to keep track of it.

MR. CRAIG GODBOUT: So you have to know how

```
many people the other person has talked to?
1
                MR. DAVE AIAZZI: No, that's their
2
    responsibility.
3
                MR. CRAIG GODBOUT: There are only four
4
    people allowed to talk to each other; right?
5
                MR. DAVE AIAZZI: No, because you could
6
     talk to these four here. And Jerry has only talked to
7
     you, so he can talk to two more people.
8
                But you still can't poll each other and
 9
     say: How are you going to vote? And pass that
10
11
     information on.
                You're not supposed to say: This is how
12
     these other two people feel about it.
1.3
                MS. SYLVIA HARRISON: As far as the actual
14
     conduct of the meeting and your own bylaws, you're
15
     free to create those. If you simply want to adhere to
16
     Robert's Rules, that's perfectly okay.
17
                But you should probably have some sort of
18
     formal mechanism for conducting the meetings. Again,
19
     you're free to set some other quorum. With a group of
20
     this size, a simple majority is probably a good idea.
21
                As I said, I apologize for all the extra
22
     stuff in the paper. We will start out by killing some
23
     extra trees. Let's get off on the right foot.
24
```

Again, any questions that arise with respect to the Open Meeting Law compliance, feel free to field those to me or to any of the other attorneys for TMWA. Or there are plenty of other specialists around town for the Open Meeting Law issues.

2.2

2.3

MR. RON PENROSE: Any other questions regarding the Open Meeting Law requirements?

We decided to move the Item 6, Selection of the Committee Chair, down to pretty much the last item.

And I think we have decided to interchange

Items 7 and 8, so we'll start with Item 8, which is

Presentation of the Terms of the Truckee River Fund

Agreement, Responsibilities of the Committee and

Limitations of the uses of the Fund Imposed by the

Agreement, and Discussion Regarding Implementation of

Committee Role.

MS. SYLVIA HARRISON: In your materials, you will see in the packet that's clipped at the top, the second item down is actually a copy of the Truckee River Fund Agreement, if you haven't seen that before.

Just to give you a little bit more background about how we decided to structure this:

Actually Dave came to me initially some time ago and

said: Can we do this?

His idea initially was to set up a foundation. But the authority for us to set up a foundation, a stand-alone foundation, the 501(c)3 Organization, was a little muddy. And as you know, trying to figure out how to -- or trying to get qualified 501(c)3 Organization takes some time, anyway.

However, one of the first actions that the TMWA Board took after the acquisition of the assets from Sierra Pacific, I think it was the second or third meeting following the consummation of the purchase agreement, was to approve a community out-reach policy.

The Board approved a policy for charitable contributions consistent with the requirements that are imposed upon cities and counties for charitable contributions. They have to be for a public purpose, they have to be for charitable organizations or other governments and so on.

Again, as a public agency, what TMWA is able to do, is only what at least one of its members can do as a city or county, it can't go beyond the authority that's granted to either a city or a county,

and what TMWA can actually do.

1.3

2.1

2.3

So what we tried to do, is figure out: How can we create a fairly large pot of money and make it adhere to the community contribution policy that was approved by the Board in 2001.

One of the things that some of the Board members were particularly interested in with the Truckee River Fund, was to try to attract private money to match the public money that TMWA would be contributing.

So I talked to some of my partners, and we talked around the community a little bit, and there exists in this community foundation of western Nevada — some of you may already be familiar with the Community Foundation — which exists to perform a couple of functions within the western Nevada community. One is to actually serve as an incubator for 501(c)3 Organizations, people who — like if Janet had chosen to go this way with her bike path project, she could have asked the Community Foundation of western Nevada: Can I put a pot of money within your foundation for this specific dedicated purpose? And that would have been available.

The other thing they do is to provide

investment opportunities and fund management for earmarked funds that are put into the foundation for a specific purpose.

1.3

2.2

And we thought that if we took the amount of money that the TMWA Board had decided to allocate for this river fund, put it under the umbrella of the Community Foundation, and then have you all serve as fund advisers for that pot of money, then we could look at it that way.

In order to comply with the requirements imposed on TMWA by statute as to how monies are to be allocated, what you will have to do is once you decide you have got a project you want to fund, you will have to come back to the TMWA Board for their approval, they will approve the use of the money by resolution, which is what they have to do to comply with the statutory requirements for their charitable contributions.

At that point then what has to happen is the Community Foundation Board gets a say, the final say, just to make sure that whatever project you're undertaking doesn't jeopardize their tax exempt status.

Things that the TMWA Board would never

approve, for example, would be: We think a really worthy project would be to put Susan Lynn up for Washoe County Commissioner, and we're going to support that. Well, that would not be a proper use of the fund, and it would also jeopardize the tax exempt status of the Community Foundation.

1.0

2.0

2.2

So that the Community Foundation gets a final veto, only to make sure that whatever the use of the money is, doesn't jeopardize their tax exempt status.

So the actual mechanics of this are described in Article IV, page 3. Part B is where you come in with the Advisory Committee, starting on page 3 of the agreement.

The Advisory Committee is comprised of nine members, three that are appointed by Washoe County, three from Reno, three from Sparks. And I don't know that any of the local governments have any sense that you're representing those governments in any way. That wasn't really the concept, just that each of the TMWA members would have a shot at appointing members of the Advisory Committee.

You do serve at the pleasure of the local governments who appointed you, however, and each of

```
the local governments decide how they appoint their
1
               We don't have anything to do with that.
2
                MS. SUSAN LYNN: Sylvia, are there term
3
 4
     times or years or months or anything like that
5
     prescribed?
                MS. SYLVIA HARRISON: Not by the agreement.
 6
                We got the Board to approve an allocation
7
     of $25,000 for administrative costs from the fund.
8
     that if you, for example, want to hire your own Court
 9
     Reporter, hire your own counsel, something like that,
10
     you may have administrative costs, you can do that up
11
12
     to the annual --
                MR. BILL BRADLEY: Sylvia, let me ask you a
13
     question about that. At the current time out of that
14
15
     administrative fund is the cost of the Court Reporter
16
     and the General Counsel's time?
                                      No, I wouldn't be
17
                MS. SYLVIA HARRISON:
18
     allocating my time to that.
                MR. BILL BRADLEY: But the reporting time
19
     comes out of that $25,000?
20
                MS. SYLVIA HARRISON: We should probably
21
22
     allocate it that way, yes. That's cumulative each
     fiscal year; otherwise, you have to adhere to the
23
```

project funding protocols that are described in Part

24

C. And here you can do whatever you want; make up your own rules about how you want to consider proposals, how you want to solicit proposals, how you want to solicit additional funding.

1.5

Probably at the next meeting, it would probably be a good idea for you to spend some time deciding whether you want formal bylaws, about how you do that, and so on. We can get into that a little bit today.

And otherwise it's fairly loose. You can bring small projects, large projects. The allocation of the funds for the next fiscal year is \$340,000 that TMWA has put into this, it will be put into the Community Foundation, January --

MS. LORI WILLIAMS: January 1st, 2005, is what the Board has authorized.

MS. SYLVIA HARRISON: So it's up to you from that point forward to make the fund work. If you don't have enough money for a project within that budget, then go out and find some more.

Or if you have a worthy project you think is going to pass muster, spend it in small increments. It's totally up to you. The only constraints on the use of the funds, as far as the purpose of the fund,

is, again, that's in the agreement, and on page 2 in the preamble to Part 3: The fund shall be used exclusively for projects that protect and enhance water quality or water resources of the Truckee River or its watershed. That's about halfway down on page 2. That's what you need to underscore and write in bold, because it's a fairly broad charter, but that's the purpose.

2.0

2.3

As far as who can be beneficiaries of the fund, then you have to flip over to page 5 and look at the fund distribution requirements. The charitable beneficiaries will be the people who are actually undertaking these projects.

It's our idea that what you will probably want to do is find somebody else that's actually -- once you have the money available, figure out what project is worth funding, then the concept wouldn't be that you actually the put shovels in the ground and start moving dirt yourself, for lots of reasons. One is that you don't want to be an entity or a group that has to go get permits, for example, to dig in the river. I don't think you want to do that, anyway.

What you want to do is you want to say:
Hey, this is something that Sparks could do, or this

is something that TMWA could do, or this is something that somebody else could do.

You can make up your own rules about whether you've got any issues with funding organizations that you're very close to.

2.3

So somebody comes to you with a proposal, and that entity, then, has to be either a government or a charitable group that's exempt under 501(c)3. Whatever you distribute to them, has to be used for the appropriate public legal purpose.

You should require the financial details, financial accountings, make sure that none of the funds that are distributed are used for political purposes, political advocacy; and then you can look at the rest of the constraints and so on. We do want to make sure that there are documentations of the agreements with these organizations and so on.

MS. SUSAN LYNN: Let me ask you something. I have a vague idea how money accrues through this fund. Can you explain that to us so we make sure we understand how the money comes to the fund, how it's collected?

MS. SYLVIA HARRISON: Right now the money that's been earmarked is just a portion of TMWA's

1 revenues. MS. LORI WILLIAMS: Fiscal budget line item 2 3 in our fiscal budget. MS. SUSAN LYNN: So it's not a special fee 4 5 that's assessed by the rate payer? MS. SYLVIA HARRISON: No. And it may go up 6 7 and down, depending on TMWA's budget. 8 MR. MICHAEL CAMERON: I think maybe we get ahead of ourselves very quickly, but if this is going 9 to be an annual decision made by the TMWA Board, then 10 it's conceivable there would be a year in which the 11 Board would vote to put nominal or zero funds into 12 this; is that true? 13 MS. SYLVIA HARRISON: That's true. 14 MR. MICHAEL CAMERON: Which will become an 1.5 interesting constraint, to the extent this group wants 16 to be forward looking and develop a program in the 17 sense of continuity. 18 That's going to be a challenge for us, in 19 terms of anticipating that, being prepared for a 20 situation where we may get zero, and yet we want to be 21 22 forward looking. MS. LORI WILLIAMS: I think the Board set 23

up the initial -- we basically brought to them a

24

proposal that started at \$340,000, basically went to a little less than a million, I think, next year, and a million, five the third year.

2.0

2.2

Now recognizing there's pressure on customer rates and revenues for that, the Board basically said: Great, let's start it off with the first year.

We kind of bought the concept that it would go up to 1.5 million, but we want to see how it works, we want to get it in place.

And I think that the more we have success of the funds, the more we can show success of being able to partner in projects, bring in funds into the fund, outside sources, other contributions, really make the most of this fund, you know, the current Board is bought in on the idea that this is going to the Board.

That said, I can't guarantee you that there isn't going to be a year where, for example, where we're in severe drought conditions, where the revenues are undercut, where there's some extraordinary thing, and the Board would have to make a tough decision, not only with this fund, but with other things, that may or may not get funded in the TMWA budget.

So there isn't a guarantee for three years, but there is a buy-in from the Board on the concept that it would be a continuing item, that it would be incremented up at some level, and we made a proposal to the Board that showed specific numbers of how that would increment up. MS. SUSAN LYNN: Then as a component of the Community Foundation, if I understand the Community Foundation, they can also guide funding into this particular fund for additional revenue? MS. LORI WILLIAMS: Yes. In fact, that's one of the benefits of using the Community Foundation, is they actually will do some advertising and some 13 advocacy, and they send out a lot of information to givers that say: Here are funds we have set up that 15 you could contribute to and make contributions to. 16 So that's one of the draws of using the 17 Community Foundation, is they will actually go out and 18 19 do that advertising work, publicity, that says: Here's a fund available related to the Truckee River 2.0 and watershed. So that's one of the attractions. 21 MR. CHRIS COBB: Are we paying them an 22

1

6

7

8

9

10

11

12

14

2.3

24

MS. SYLVIA HARRISON: Yes, they will be

administrative fee for this as well?

```
charging an administrative fee for taking caring of
     our --
3
                MR. CHRIS COBB: What are we looking at
     that annually?
 4
                MS. SYLVIA HARRISON: Is that one percent?
5
                MS. LORI WILLIAMS: If we don't make enough
 6
     to cover one percent, then it will be the interest
7
8
     that we make. And if we do make enough, then it's one
 9
     percent.
                So they basically have said: Yes, we will
10
     give you kind of a grace on this, recognizing that if
11
     your investments aren't making enough return to cover
12
     the administrative costs, that that would be
13
     burdensome to the fund. So we won't basically net
14
15
     down the fund through the administrative fees.
     long as we're making one percent, that's their
16
17
     administrative fee.
18
                MR. RON PENROSE: I have a question.
                                                       Do
19
     the funds accumulate?
                MS. LORI WILLIAMS: They can. For example,
20
     if you decided that you had $340,000 this year,
21
     there's nothing that says that if you wanted to do a
2.2
     larger project and you kept $300,000 from this year
23
     and added what the Board puts in next year to fund a
24
```

bigger project in the third year, or something like
that.

In my mind, there are no rules about that.

So you could target a bigger project a couple years
out, and basically work to accumulate funds to do
that.

1.5

MR. CHRIS COBB: I think we have to be careful about that, though. I think the Board set this up to see some action, so we've got to be a little careful how far out we --

MS. LORI WILLIAMS: Again, I think you would be bringing that idea to the Board probably up front, and saying: Here's what we want to fund. I mean, that's just my perception of it.

MS. JANET CARSON: Is there a date in the year when the budget is established for TMWA, that we would know what the --

MS. LORI WILLIAMS: Yes, we have a budget hearing in May. It's a very prescribed date in May, and it's around the 20th, usually.

Last year it was the 20th. This year it might be the 18th. It's the third Thursday in May.

MR. MICHAEL CAMERON: Following up on the multi-year question. So if we were to receive a

```
proposal that has a multi-year time frames, we would
1
 2
     be able to grant it, but we're committing it from the
 3
     funds we have as of that day?
 4
                MS. SYLVIA HARRISON: Well, yeah, depending
 5
     upon how successful you are in getting private funds
 6
     as well. I mean, TMWA cannot commit beyond a budget
 7
     year.
 8
                But certainly there are some members of the
 9
     Board that are looking at this very closely to see if
10
     the idea of putting money in really as seed money to
11
     be able to tackle larger projects, with the
12
     contributions from other sources, private or public
13
     sources, is one of the ideas that they would really
14
     like to see succeed.
15
                MS. SUSAN LYNN: Would it behoove us to go
16
     out and beat the bushes for other private
17
     contributions?
18
                MR. MICHAEL CAMERON: It's private or
19
     public, I think. I suspect the larger number is going
20
```

to be public partnering; I'm just going to guess.

MS. LORI WILLIAMS: For example, if the City of Sparks wanted to say, "Hey, this is working, this is a good idea, and we want to earmark some money and drop it into this fund and have this fund advisor

21

22

23

administer this fund for the purpose of water quality on the Truckee River, which is a key interest of the City of Sparks and the City of Reno, and Washoe County; I mean, anybody who is in the water quality, sewer affluent business, that's a key interest, it's a key factor. So if any of those agencies wanted to pool money in there, they could.

1.3

2.3

MR. MICHAEL CAMERON: I guess I was thinking even what I suspect, at least I would expect to be even more likely than that, is that projects will come forward that have multiple public funding, and that I hope will be somehow recorded and registered and visible as leverage for the TMWA Board's point of view.

If this fund contributes 25 percent of a worthwhile project, we may not get the other 75 percent to be reflected in our fund balance, but it's still a leverage used of the Truckee River fund dollars.

MS. LORI WILLIAMS: By the way, we have an excellent public relations firm we work with, and we will be working with them to get that message out:

We're doing great things on the Truckee River, here are things that this advisory group, that this fund

has done, and how we have participated in the Truckee River. So that's one of the components we will be looking at, is getting that messaging out.

2.1

MS. SYLVIA HARRISON: That partnering is one of the key things. If the TMWA Board wanted to do this on its own, just to fund projects, they could do that, but it really wanted to get a broad-based group of community representatives, such as you folks, to help spot and formulate uses for this fund.

MR. BILL BRADLEY: Sylvia, in the wildlife arena, there is the ability to match with Federal grants that oftentimes give you a three-to-one match. I'm wondering whether in the area of water quality, Federal grants like that are available. If you think about that, it would behoove us to have someone who could help us identify Federal grants. That's the good news.

The bad news is the timing trying to get those grants associated with then having to go to the Board, then having to go to the Community Foundation, we will need a pretty clear calendar in order to evaluate projects and be able to get our bang for our buck, get the money, and get it on the ground in a calendar year.

```
MR. CHRIS COBB: Your calendar year, I
 1
 2
     understand, is January?
 3
                MS. LORI WILLIAMS: We're fiscal.
                                                    It's
 4
     July 1 to June 30th.
 5
                MR. CHRIS COBB: Federal, if I remember
     right, is October?
 6
 7
                MS. LORI WILLIAMS: It's October.
 8
     staff can help work through some of those issues.
 9
                MR. BILL BRADLEY: Do you have anybody that
     has a specialty in identifying Federal grants?
10
                MS. LORI WILLIAMS: We don't. But we don't
11
12
     have anyone who has a specialty in writing grants, so
13
     when Susan said she's done that, my ears perked up,
14
     because some of the agencies do, so we have borrowed
15
     them from time to time to help us.
16
                But we're out there always looking for
17
     Federal money. We do have a Federal legislative
18
     lobbyist who also has been working closely with the
19
     State, and there is Federal money coming to the State
20
     for water quality and those kind of things that are
     earmarked for those issues under the Clean Water Act
2.1
22
     and things like that.
23
                So we're pretty much linked in, as I am
24
     sure the Sparks folks are, into some of those programs
```

that are available at the State level and also at the National level. So finding out about them and then just working through the details of them.

Again, timing can be a challenge, but one of my experiences with the Federal Grant Programs, in particular, is: Just don't be in a hurry, because it will take a long time to get it. So you actually have quite a long schedule sometimes to put all the processes in place.

MR. BILL BRADLEY: The agency that sees the most amount of money from the Federal Government to the State, is that Environmental Protection?

MS. LORI WILLIAMS: Probably, yes. And they are actually currently administering both the Clean Water Act money and the Safe Drinking Water Act. So NDET is administering both of those now.

next legislative session, probably next July, there is an agreement where NDET will be taking over the health department, State health function of Safe Drinking Water Act regulations, so that will now fall under, as of next July, under NDET, so really bringing those two very linked items together at a State level, so that's good.

MR. CHRIS COBB: There's also AB198237 money they grant out and they're only doing it for water systems, but there is also money in there for conservation programs. Most of it's been allocated, and I think they'll have to re-allocate in the next legislative session.

MS. JANET CARSON: At the risk of sounding really procedural, it seems like it would be helpful to have a calendar of the budgets in mid-May; this Federal fund has a submittal date of February; the time line to get the community fund approval and the TMWA Board approval is "X" month; if we could have that sort of set out in sequence, because it's going to really affect what we decide to do on Number 10 about our meeting dates.

MR. CRAIG GODBOUT: Meeting dates, and then when we accept projects and say: Okay, this is our drop-dead date for a decision on a project.

MS. JANET CARSON: Right, we need to ask them by such and such a date, driven by all these other things.

MS. SYLVIA HARRISON: The TMWA Board meets

10 times a year now, I believe, and more frequently if

it needs to. We try to have a monthly schedule with a

1 grace period. MS. LORI WILLIAMS: Typically what happens 2 is we have a monthly meeting scheduled. If we don't 3 4 have anything, we don't meet. If we do have something, and this would be something, we would --5 6 mean, we would hold a meeting even if there was just 7 this agenda item on it, if we were on a time line 8 where we needed to do that. MS. SYLVIA HARRISON: We're pretty quick 9 with our agendas, so as long as we have an item that 10 11 can be posted three working days before the meeting. 12 MR. RON PENROSE: Are you looking at a 13 calendar for the year, Janet? MS. JANET CARSON: Yes. 14 15 MR. RON PENROSE: We can put something 16 together for you. 17 MR. BILL BRADLEY: We work under a similar 18 constraint, and it's pretty challenging; and we don't 19 have any money to spend. 20 MS. LORI WILLIAMS: We will have to find 21 out on that. 22 MR. MICHAEL CAMERON: In some ways I am so excited about this I can barely stay in my seat. 23

thing that's kind of really sort of on my mind,

though, is how the potential of this fund, of this group, seems to me to be quite high, but it's not guaranteed, and how we get started and how successful we are in doing our job is going to determine whether or not we reach that potential.

I am trying the think: Well, how do we get off to a good start? A couple of thoughts occur to me that this is a great group, just based on short introductions in terms of people's experience, knowledge of the river, knowledge of funding, foundations, public agencies, all those things. I think we have a lot of strengths. And I'm sure we have some weaknesses, too, in terms of given the mission of the fund, and who we are, we probably have built in biases here that would be good if we knew, as a group, what they were, so that we could fend off our own biases and so on.

These are all: How do we spend the time as a committee to develop a sort of collective sense of who we are, what the opportunities are, is sort of a question that's on my mind.

It seems perfectly appropriate that today we're dealing first with the mechanics, and really nuts and bolts stuff, but I am already in my mind at

```
1
     that next step of trying to figure out how do we -- I
     mean, how do we make ourselves into a living,
 2
 3
     breathing, functioning body from a collection of
 4
     people who just met each other for the first time?
 5
                MS. SYLVIA HARRISON:
                                       I would recommend
     that you do one of Janet's field trips sooner rather
 6
 7
     than later.
 8
                MR. CRAIGGGODBOUT: Is that subject to the
 9
     Open Meeting Law?
10
                MS. SYLVIA HARRISON: It is. All we have
11
     to do is arrange transportation for members of the
12
     public who choose to show up in the parking lot, and
13
     notice them. We have done it lots of times.
14
                MR. BILL BRADLEY: The key is advising the
15
     public□ first step. I was just thinking that it may
16
     not be a bad idea for us to meet with the public
17
     relations' agency that TMWA works with to just get an
18
     idea of how we go about, for no money, getting the
19
     word out on getting buy-in for this concept of a
2.0
     Citizen Board, administrative costs for the road.
21
                MS. SYLVIA HARRISON: That's a great idea.
22
     I think that certainly the two city councils would
23
     welcome a presentation from you all. I don't know
```

what to say about the County Commissioners at this

```
1
     point, but I know we can have Marlene Olson available
 2
     at the next meeting, and she's wonderful, she's just
 3
     got gobs of ideas, and TMWA has a terrific website.
 4
                MR. BILL BRADLEY: I know this is a little
     bit further, but it's part of the initial meeting.
 5
 6
     I've read the correspondence here. Is the county
 7
     adverse to this? Or are they sticking their head in
 8
               Or what really is the -- what's the damn
 9
     politics?
10
                MS. SYLVIA HARRISON: Do you really want to
11
     go there?
12
                                   That's the next item.
                MR. RON PENROSE:
13
                MS. SYLVIA HARRISON:
                                      If you all want to
14
     move to this issue --
15
                MR. MICHAEL CAMERON: I would, but before
16
     we go there, as a way of coming back, a place to come
17
     back to the conversation we were just having, and
18
     before we adjourn today I would love to maybe set the
19
     agenda for -- I'm sure we will anyway -- but to set
20
     the agenda for our next meeting, and there were a
2.1
     couple things we have gotten onto here, and I don't
22
     want to lose track of them, but public support, where
23
     are other likely funding sources, and calendars.
```

We're starting to shape the agenda for our

MS. SUSAN LYNN: And I would add that somehow we need to develop some criteria and procedures, make some decisions.

MR. MICHAEL CAMERON: Right. It could be a fairly -- I think we need to spend some time together, with respect to our potential, but let's shape an agenda for our next meeting, and start fishing this out and put some time into it.

I just wanted to make that final comment before you went into the legal questions of the counties.

MS. SYLVIA HARRISON: You probably have gathered by the materials, that for some odd reason there were a couple of County Commissioners who got fairly negative about this whole idea of charitable contributions from TMWA, basically TMWA revenue, being used for this purpose. And I still don't know exactly what the motive was. There were a couple of people that reacted very negatively to this.

MR. BILL BRADLEY: Who were those?

MS. SYLVIA HARRISON: Well, Jim Shaw was one; he's gone. Dave Humpkey was another one, probably the instigator of most of the negative --

MS. JANET CARSON: And Pete --

MR. BILL BRADLEY: He's gone, too.

think, was also adverse to it. I don't know whether there were some adverse comments from one of -- there were some adverse comments from a bunch of TMWA's wholesale customers, Sun Valley GID, when the Board considered this, and I don't know whether Washoe County is thinking of itself; you know, thinking of the Utility, Washoe County Utility, as a major wholesale customer of TMWA, and whether this is an appropriate use of some of the fees that they pay, or whether what we're seeing is simply a symptom of the term issues between the cities and the county. And I think maybe a combination of all those things.

Some of the Commissioners have this unfortunate perception that TMWA is a creature of the cities. It's ludicrous. There are three members of TMWA, Washoe County, Reno and Sparks, have entered into a cooperative agreement to purchase the water assets from Sierra.

The representation on the TMWA Board is three from Reno, two from Sparks, \Box nd from Washoe County, is set up that way to reflect the customer

base, because TMWA actually has very few customers in unincorporated Washoe County.

2.1

So there's sometimes a little bit of a feeling among the Commissioners that they are not adequately represented at TMWA. But unfortunately I just think that there's some -- speaking candidly here -- that goes on, that we really can't quite understand, and don't really understand why there is this attitude on the part of some of the Commissioners by this, adverse to TMWA, but there is.

MR. MICHAEL CAMERON: I sat through one of the County -- actually when Lori had to go give a presentation, and I was at the County Commission meeting, and then the following day the TMWA Board met. It was an interesting kind of one-two punch on the subject.

And one observation I would make is that as an idea that was in process as it was first brought to the County Commission for them to vote on their three appointees and whether to embrace this, the fond idea was to -- I mean, I want to point to what I think is sort of the 10 most key words in this document on page 2, the purpose of the funds, the wording in that, at the end of that first main paragraph: To protect and

enhance water quality, or water resources of the Truckee River or its watershed. Which I think it's great language, is my own opinion, it's focused, and yet it's fairly broad and permissive at the same time.

This language -- I mean I don't know if it actually existed the day of that County Commission meeting, but they certainly weren't aware of it.

They were, I think, under the misimpression that the parameters for this fund were about as open as one's imagination is. So they were thinking potentially basketball courts or whatever. And the question, as I heard it, was: What burden can we place on -- to put it in a positive -- on TMWA ratepayers? You know, it was a nexus question.

And it was at the next TMWA Board hearing, at least it's my recounting of the events, that this language on protecting enhanced water quality, where those words were really pinned down.

And I think to the extent a legitimate substantive question was actually raised amongst the political positioning, if you will, was this nexus question, which I think was well addressed the next day at the TMWA Board meeting.

And I'm not sure that it ever really closed

1.0

1.5

the loop, because public positions had been made by certain Commissioners, and they sort of wanted to stick to their guns. And yet I actually viewed it as a fairly natural evolution; just kind of it went through the process of discussion and debate.

I think the good news out of it is we got some excellent guidelines for the foundation. But that doesn't mean we still don't have lingering -- I don't know if problems is overstating it but, you know, this question from the County seems to persist.

MR. JERRY PURDY: I think we ought to move on.

MS. SYLVIA HARRISON: Let me just tell you where we are. The Washoe County Commissioners voted to solicit an opinion from the State Attorney General, as to the legality of this river fund. And they asked about three different questions in their request, but it really comes down to: Does TMWA have the legal authority to make charitable contributions?

And the guestion is framed as: Is that one of the delegated functions within the cooperative agreement?

The request for opinion kind of came out of left field. I did not receive a copy of this for

about a month, until I asked for one. I was pleased that the Deputy Attorney General, who has been asked to look at this, called me up and asked for some input from TMWA, because that's not typically what you have an opportunity to do.

So I went back and reproduced some of the history of charitable contributions that TMWA has been engaged in, and I found it sort of ironic that Jim Shaw was voting with the rest of the Board in approving the charitable contribution policy in 2001.

I believe that we have excellent evidence that when the members created TMWA, they had every intention that TMWA would continue to be an active member of the community and make contributions to the community of this type.

Really that's what I think the Attorney

General is looking at, is: Was it the intention of

the members when they created TMWA, to allow this type

of activity? And is that then a delegated function in

a cooperative agreement?

I don't know. I think the Attorney General actually has a pretty good out. I don't think that it's really a question of law of the type that the Attorney General typically would offer an opinion

about. I think it's really a matter of interpreting the cooperative agreement, and from that standpoint it's something that's probably better left to the members.

2.1

2.3

One thing you should know, that I think is comforting, is that Attorney General opinions are not binding, they are not law, they are just opinions.

And I think that even if we were to receive an adverse opinion from the Attorney General, my bet would be the TMWA Board would say: We don't care, go ahead. That would be my bet.

But then there you have it. We are potentially under that little cloud right now, and don't know what the Attorney General is going to do. I doubt very much that the County Commissioners would withdraw their request; although that would be nice, but I doubt that they will, and so there's that lingering uncertainty.

MS. SUSAN LYNN: Is there any time when you might expect an opinion?

MS. SYLVIA HARRISON: Don't really know. So there is the possibility that the rug could be pulled out from underneath this group, and you may find yourself devoting quite a lot of time to it,

1 | but --

2.0

2.1

MR. MICHAEL CAMERON: Would you advise that we not make any decisions with respect to funds until there's some --

MS. SYLVIA HARRISON: My advice would be --shall I go ahead and give it? I will tell you what I think.

I really think that even if we got an adverse Attorney General opinion on this, that we really have pretty strong evidence; again because of the participation in the County of this formulation of the charitable contribution and policies and so on, that it is a delegated function of TMWA.

I really don't foresee that we would be in a legal battle about it with anybody.

MS. LORI WILLIAMS: I also believe there are other ways that we can do this. I mean, we've chosen to go the Community Foundation route because we think it would give us the best bang for the buck, and a lot of reasons to go that route.

But clearly TMWA's staff and TMWA's Board believes that we have the stakeholders in the river, that we have to participate in its protection, its improvement, you know.

And are there other ways we can do that?

Could we do it through capital budget items, line

items? Yeah. Is that going to get us the best bang

for the buck? Maybe not.

It may limit some of the things we can do; but I think that there will be other ways that if we didn't go this route, that the work would not be for not, that staff and the Board, I think, would still support the stewards of the Truckee River.

MS. SYLVIA HARRISON: It's hard for me to imagine that there could be a funding, the Attorney General's Office, or if it came to it in a Court battle, that being stewards of the Truckee River wasn't an appropriate function for TMWA. It's inconceivable to me.

MS. SUSAN LYNN: Well, the cities and counties don't make charitable contributions, or contributions to charitable contributions for other equally important activities.

MS. SYLVIA HARRISON: And one of the ironies of this is that the largest charitable contribution TMWA will be making is a 1.5 million dollar donation to the kayak course to reimburse the county bond funds.

```
MR. PENROSE: Okay, would everybody want to
take like a five-minute break and come back and tackle
the committee chair item, and the protocol procedure
for evaluating projects, or just keep going?
           MS. SUSAN LYNN: I'd prefer to keep going.
           MR. RON PENROSE: Do we want to start
talking about a committee chair at this point before
we get into evaluation criteria for proposals and that
type of thing?
           MR. MICHAEL CAMERON: What about the idea
of an interim couple of meetings? It would be great
if somebody were really conducting the meetings for a
couple of times, but we don't know how big a job it is
or --
                              I will offer that if
           MS. LORI WILLIAMS:
you would like Ron to continue to chair the meeting
and work to develop the agenda and things like that
with you, we would be happy to --
           MR. JERRY PURDY: I think I would like to
see that until we figure out where we're going.
           MS. LORI WILLIAMS: We don't want to take
         We're very sensitive to the fact that we
control.
don't want to be running this. We want to be
assisting you as staff in --
```

22

23

MR. RON PENROSE: Then I will continue to 1 2 quide the meeting. So everybody's okay with that? 3 MR. MICHAEL CAMERON: I guess I'm going to 4 try for one more second on the idea: I still think it 5 might be, just for the sake of this group, getting from the very beginning, a sense of itself and how we 6 7 function as a group. I have a slight preference that somebody 8 9 other than me, actually, but somebody of our group, 10 just for a meeting or two, so we actually get in the 11 habit of running our meetings, and I'll just try that 12 one more time. MS. LORI WILLIAMS: Are you volunteering, 13 14 Michael? 15 Sounds like it. MR. RON PENROSE: 16 MR. MICHAEL CAMERON: There's a: 17 careful what you ask for. 18 MR. JERRY PURDY: Just a minute. I think 19 we should not go appointing anybody for a while until 20 we see who is the best person. It's great to 21 volunteer for these jobs and that kind of thing like collective watch bobs or something, but I have a hunch 22 23 after a couple meetings we would know who we want for a chairman. Not the one that just speaks out all the 24

```
1
     time, but the one that really has the direction, the
 2
     motivation, the drive and the innovation, and I'd like
 3
     to see our gunner there lead us for a time or two
 4
     until we get to know each other.
 5
                MR. MICHAEL CAMERON: I wasn't suggesting
 6
     that, choosing a chair for -- it was just for a
 7
     meeting or two. But let's go with Ron, that's fine
 8
     with me.
 9
                MR. CHRIS COBB: Quick question. Once we
10
     eventually do, if we so decide, pick a committee
11
     chair, then we would no longer have a TMWA person?
12
                MS. LORI WILLIAMS: No, Ron will attend the
13
     meeting, regardless.
14
                MR. CHRIS COBB: I like the idea of having
15
     Ron present.
16
                MR. RON PENROSE:
                                  Right.
17
                MR. CHRIS COBB:
                                 The makeup is three from
18
     each, whereas at least I like having a TMWA individual
19
     in here.
20
                MS. LORI WILLIAMS: He wouldn't have a
21
     vote, but he's here to provide information, hear your
22
     needs, to basically make sure that whatever you guys
23
     want on the agenda next time, that that's what we get
```

posted for you, and all those kind of things.

answer questions. I mean, Ron is a warehouse of knowledge. So it's not like he's not here to give you his input or his experience or whatever.

2.1

MR. DAVE AIAZZI: I'm going to leave after this, because I always want to get involved in these, and I promised myself I wouldn't, but I'm going to say one thing. I was very happy when a lot of people said they weren't sure who appointed them, and I just hear there's three from each.

I really hope what we're doing here is for -- that's the default position. The reason they brought it forward, instead of having the TMWA Board do it, there wouldn't be three from each. And the hope is that you guys are bringing together the groups that have shown interest in the river as a whole, and not just the interest of Sparks or Reno.

What my job is going to be -- I'm not going to stick around for public comment -- but what I will guarantee you is: I'm going to support whatever you guys do, whatever it is.

Our job is: You guys are here hopefully spending your time, going to present things. Two things: I will support whatever you decide; and I will try to continue to support to get the money here

```
Those are the two things that I have.
1
     every year.
                But I hope, and I think everyone does, but
2
     at the start let's don't say there's three from each,
3
     let's just say that we're here for the river, and
 4
     TMWA's drinking water.
 5
                MS. SUSAN LYNN: Thanks, Dave.
 6
7
                MS. LORI WILLIAMS:
                                     Thanks.
                MS. JANET CARSON: I will make a motion we
 8
     table the matter of selection of committee chair until
 9
10
     next time.
                MR. CRAIG GODBOUT: I second that.
11
                MR. PENROSE: Everybody in favor?
12
                (They all say aye.)
13
                MR. PENROSE: Motion passed.
14
                Although we have got Item 9 as a
15
     discussion/development of protocol or procedure for
16
     soliciting and evaluating proposals; and Item 10 is
17
18
     set schedule for future meeting dates, would you like
     to discuss Item 10 first, relative to scheduling?
19
                                  Yes, that would be
20
                MS. SUSAN LYNN:
21
     helpful.
                MR. RON PENROSE: So let's talk about it.
22
                MS. JANET CARSON: I will start out.
23
     don't even have a clue how often might this group
24
```

```
You know, I don't have a good feel for that.
1
     meet?
                MR. RON PENROSE: I have a suggestion.
2
3
     Susan, go ahead.
                MS. SUSAN LYNN: Go ahead.
4
                MR. RON PENROSE: I was going to try and
5
     put together that calendar thing you requested,
6
     annual, that would provide all of the Board meeting
7
     dates, also the budgeting calendar from the standpoint
8
     of TMWA, maybe some of the other agencies, maybe
9
     provide that to this group at the next meeting, and at
10
     that point maybe you can -- maybe the next meeting
11
     should be in another month, so you can take a look at
12
     that and at that point in time you can decide on the
13
     frequency of your meetings.
14
                MS. SYLVIA HARRISON: When is the next TMWA
15
     Board meeting?
16
                MR. RON PENROSE: I don't know.
17
                MR. BILL BRADLEY: I am not concerned about
18
     the next TMWA Board meeting, because I see us starting
19
     off with probably several meetings to get our feet on
20
     the ground and get a good game plan, and then
2.1
     coordinating with those Boards' calendars.
22
                 I think we probably ought to be looking at
2.3
     a couple months, January, February, at least in the
24
```

short term.

2.2

MR. JERRY PURDY: In respect to that, there's no reason why a person shouldn't meet and do what you say, checking the Boards and so forth, but I think you might want to think about these meetings relative to what projects we might be looking about --you know, 12 meetings, all of a sudden you can throw another year away on the calendar. Certain of these things need to be done and acted on, and I think if the situation demands it, we ought to whip up the mules and meet more often, more frequently, less time, and leave that meeting schedule flexible, meet at least once a month.

But I had a proposal I'd like to talk about here that involves 10,000 pounds a day of total dissolved solids flowing into the Truckee River.

That's over 400 pounds an hour.

If there was 400 pounds sitting out there on the floor with handles on it, I doubt like hell if a bunch of us could lift it off the ground. So every hour another 400 stacks up, so there are certain things that I think we probably ought to meet on and act and get some recommendations out, and take our routine as it goes along.

MR. BILL BRADLEY: One of the things that I 1 think we're going to have to be careful of, is we have 2 a budget of \$50,000 this first year. And I don't 3 think for \$50,000 we can lift that 400 pounds, to be 4 honest with you, but develop some recommendations --5 MR. JERRY PURDY: Exactly. 6 MR. BILL BRADLEY: -- and on a long-term 7 8 analysis of that. Taking a look at a \$50,000 budget, and 9 knowing that the TMWA Board will be doing a new budget 10 short of its July 1st new fiscal year, it seems to me 11 that between now and July 1st we'll be looking at 12 expenditures, if possible, of a \$50,000 little --1.3 either a miniature project or -- and some of our 14 quidance in here indicates that we have to approve one 15 project a year through the Community Foundation. 16 MS. JANET CARSON: 17 Per calendar year? MR. BILL BRADLEY: Well, it didn't say 18 that, and I wasn't sure about that. 19 One of the things that I thought we would 2.0 need on our next agenda is a representative from the 21 Community Foundation to explain our partnership. 22 But if we only have six months, and I'm not 2.3

sure if that's true or not, on that first \$50,000 --

```
MR. MICHAEL CAMERON: Where are you getting
1
     the $50,000?
2
                MS. JANET CARSON: Yes, I thought it was
3
     $340,000.
4
                MR. BILL BRADLEY: That's what they
5
     dedicated to the fund, but we have a budget of
6
     $50,000, and I have got that.
7
                If you look on page 2 of Sylvia's November
8
     29th letter --
9
                MS. SYLVIA HARRISON: No, no, that's not
10
     you; that was the initial contribution.
11
                MR. BILL BRADLEY: Oh, okay.
12
                MS. SYLVIA HARRISON: That's was the one
13
     that was funded in 2001.
14
                MR. BILL BRADLEY: So we've got $349,000?
15
                MS. SYLVIA HARRISON: We've got $340,000.
16
17
                MR. BILL BRADLEY: All right, I apologize
18
     for that. That makes a little bit of difference,
19
     then.
                MS. JANET CARSON: Between now and the end
20
     of June?
21
                MS. SYLVIA HARRISON: Yes.
22
                MS. SUSAN LYNN: My sense is that the
23
     University is here; Jerry has a project, I'm sure;
24
```

everybody in this room probably has a project they can recommend. But I also think that we need to know what other things are going on in the community and what other needs there might be. I mean, Sparks may have a project, and ENDOW may have a project, God knows.

1.5

2.2

2.3

So I think we need to maybe spend some time up front and maybe have a longer meeting or more frequent meetings to get your procedures for application. I mean, I appreciate that the University is here today, because I know they have some good projects. But I think we need to have some sort of format by which we can judge apples with apples and oranges with oranges.

MR. MICHAEL CAMERON: I think the question we will have to resolve in some way is: How do we interpret the phrasing of protect and enhance water quality or water resources of the Truckee River? What does the University consist of that qualifies for that? And then from there, how do you choose to allocate a limited amount of dollars across that universe?

We have to kind of get buckled in a little bit on that before we can make sensible decisions and demonstrate to the community that we're making good

use in spending the funds.

1.5

2.2

2.3

MR. PENROSE: May I suggest something? I think we're starting to get into the discussion on protocol, and how you evaluate proposals, and this is the engineer coming out of me.

I think you will need to develop a set of criteria that you can evaluate that are tied real closely to the parameters of this fund: Water quality, watershed enhancement.

And it could be a laundry list of 10 items, and you might want to put some type of waiting factor on them. That way you're going to be able to evaluate, I think, projects as they come through fairly, and you're going to be able to prioritize them. So that's just a comment.

MR. CHRIS COBB: Has your group -- you have got a little bit of experience with this with the Glendale Diversion -- did they set up a criteria?

MR. RON PENROSE: Yes.

MR. CHRIS COBB: Maybe some of those items we could take a look at and see if they would assist us in developing criteria.

I know they are going through a lengthy public process, but maybe some of that criteria they

are using might be beneficial to this group. 1 MR. JERRY PURDY: How about cranking that 2 out for us? Serious; you guys have the expertise, you 3 4 cooked up the funds. Why don't you get that criteria and run it by us, let us review it and approve it. 5 least we'll know we are in step with the objectives. 6 MR. RON PENROSE: What we could do, is we 7 could make a copy of the criteria. We're still a 8 9 draft criteria relative to this Glendale project, but that could be sent out to you in an information 10 packet, you could evaluate it, and then it could be an 11 item of discussion at the next meeting, and hopefully 12 you could finalize your evaluation criteria. 13 MR. CHRIS COBB: Before we move on, it 14 seems like we have moved from 10 to 9. Did we want to 15 go ahead and make at least a motion for now to have a 16 17 meeting in January, at least? 18 SUSAN LYNN: Can you set a date in January? MR. RON PENROSE: Do you want to talk days 19 and what looks good? Do you like Mondays? 20 MS. JANET CARSON: January, Monday the 21 2.2 10th? I'm in favor of it. MR. MICHAEL CAMERON: 23

I think we have a lot to talk about, that's my

```
1
     opinion. I am in favor of a longer meeting that day,
 2
     if people can afford the time.
 3
                MS. JANET CARSON: I'll go for a longer
 4
     meeting if somebody provides coffee.
 5
                MR. PENROSE: Is it Monday the 10th?
 6
                MS. JANET CARSON: Monday the 3rd is a
 7
     holiday.
 8
                MR. PENROSE: How about Monday the 10th?
 9
                MR. TOM SWAN: I am not available the 10th.
10
                MR. PENROSE: How about Tuesday the 11th?
11
                MR. TOM SWAN: I'm not available that week.
12
                MS. JANET CARSON: How about the week
13
     prior?
14
                MR. RON PENROSE: How about Tuesday the
15
     4th?
16
                MR. TOM SWAN: Yes.
17
                MS. SUSAN LYNN: I'm not here.
18
                MR. RON PENROSE: How about Wednesday, the
     5th?
19
20
                MR. BILL BRADLEY: You're going to have a
21
     heck of a time.
22
                MR. JERRY PURDY: I think we ought to pick
23
     a date, and some that can make it, can; those that
24
     can't are just going to have to miss the meeting. I
```

```
1
     don't think we're ever going to get one that fits
 2
     everybody. There's a lot of horse power here and busy
 3
     folks.
 4
                MR. MICHAEL CAMERON: I would suggest let's
 5
     try a little later in the month, if there's a chance
 6
     that people's calendars are more open.
 7
                MR. CHRIS COBB: How about the 17th?
 8
                MR. RON PENROSE: That's a holiday.
 9
                MS. JANET CARSON: What about the 6th or
10
     7th?
11
                MR. TOM SWAN: I am gone the 8th through
12
     the 16th.
13
                MS. SUSAN LYNN: The 6th or 7th would work.
14
                MR. MICHAEL CAMERON: Not actually. I
15
     think if we go later in the month, it's a delay for
16
     our group, but what if we go to the week of the
17
     sometime the week of the 17th? Monday the 24th?
18
                MR. CHRIS COBB: How about Tuesday the
19
     18th?
            I don't have a problem with that.
2.0
                MR. BILL BRADLEY: Works for me.
21
                MR. MICHAEL CAMERON: Works for me.
22
                MR. RON PENROSE: How about if we conduct
23
     the meeting in the afternoon from 1:00 to 5:00?
```

will give you plenty of time with a break, and we'll

```
1
     have coffee and cookies.
                MR. BILL BRADLEY: What time is it?
 2
                (A short discussion on timing was held.)
 3
 4
                MR. PENROSE: That's a good idea.
     about starting at 9:00, and then we'll just take as
 5
 6
     long as it takes, and we'll have some sandwiches.
                MS. JANET CARSON:
                                   That's the 18th?
 7
 8
                MR. RON PENROSE: Tuesday the 18th.
 9
                MR. MICHAEL CAMERON:
                                      Not to be too high
10
     maintenance, but can we find a room from where you can
     see the river?
11
12
                MS. SYLVIA HARRISON:
                                      We can meet at
13
     McDonald, Carano, if our conference room is available,
14
     it's right downtown, 100 West Liberty, the old Porsche
15
     building, the 10th floor. You can't see the river,
16
     but it has a nice view.
17
                MR. MICHAEL CAMERON: A great room is at
     Reno Parks & Rec with their conference room. I just
18
19
     think we ought to put ourselves in -- be inspired.
20
     This is an inspired effort.
21
                Not that this room isn't inspired, Ron,
     don't take offense.
22
23
                MR. RON PENROSE: I'm just here to listen.
24
                                  That's fine.
                MR. CHRIS COBB:
```

```
MS. SYLVIA HARRISON: We will see if it's
1
2
     available.
 3
                MS. SUSAN LYNN: Here you have access to
     copy machines, if we need to, and stuff like that.
 4
5
                MR. BILL BRADLEY: And coffee.
 6
                MS. SUSAN LYNN: I agree with the
7
     inspiration, but sometimes just administratively it's
8
     nice to have access to resources.
9
                MR. MICHAEL CAMERON: We'll leave it up to
10
     you guys to figure out where. But if we can find a
11
     location that's conducive to good thoughts on the
12
     Truckee River, it would be great.
                MR. JERRY PURDY: Maybe we should think
13
14
     about staying where we can get some resources. If we
15
     wanted to run off a copy here today, you can hike it
16
     out and make it happen. It's little awkward when you
17
     start trying to get somebody down at McKinley to go
18
     make copies and pay for it out of their budget and
19
     what have you.
                MR. MICHAEL CAMERON: I would settle for
20
     windows.
21
22
                MS. SYLVIA HARRISON: We have lot of
23
     windows.
24
                MR. RON PENROSE: We will take all those
```

```
1
     items into consideration. It could be here.
 2
                MS. JANET CARSON:
                                    But we are settled on
     the 18th at 9:00 o'clock?
 3
 4
                MR. RON PENROSE:
                                   Yes.
 5
                                      With coffee, Janet.
                MR. MICHAEL CAMERON:
 6
                MS. SYLVIA HARRISON:
                                      Do you want counsel
 7
     for that?
               Do you want me present or somebody?
 8
                MR. RON PENROSE: I think so.
 9
                MS. SUSAN LYNN: I think it might be useful
10
     to have you here for at least the first part of it.
11
                MR. CHRIS COBB: I have another suggestion.
12
     If we're going to be judging projects on the benefit
13
     to the river, shouldn't we know the current condition
14
     of the river? Can somebody give us a presentation?
     You know, water quality, what's the current TMBLs,
15
16
     what are some of the problem spots in the river?
     an overview of the river?
17
18
                I know bits and pieces of it, some policies
19
     and other policies. But to be honest, I don't have an
20
     overall understanding.
21
                MR. PENROSE: It may be a project like an
     evaluation of the water quality of the river.
22
23
                MR. MICHAEL CAMERON: Can I make that as an
```

agenda item for our next meeting, that we discuss how

```
1
     we answer that question? I mean, we can get a
 2
     presentation at the next meeting, but I think --
 3
                MR. CHRIS COBB: Who knows the most about
 4
     it?
         Ron?
 5
                MS. SYLVIA HARRISON: Well it depends what
 6
     question you're asking.
 7
                MS. SUSAN LYNN: Yeah, there are a lot of
 8
     specialists in this room that have key pieces.
 9
                MR. CHRIS COBB: That's what I mean,
10
     everybody knows pieces. Isn't it our responsibility
11
     to get a broader view?
12
                MS. SUSAN LYNN:
                                 The Regional Planning
13
     Agency has a whole list of agencies that operate on
14
     the Truckee River, they put together a report. Maybe
15
     we can get a copy of that for everybody.
16
                MR. CRAIG GODBOUT: I have that.
17
                MS. SUSAN LYNN: Okay. It lists all the
18
     agencies, their contact person, phone number,
19
     etcetera.
20
                MR. CRAIG GODBOUT: I have that somewhere.
21
                MR. RON PENROSE: I will add one thing,
22
           TMWA, when we were Sierra Pacific Power Company,
23
     we conducted a watershed sanitary survey of the
24
     Truckee River system, it was back in about 1990, we
```

had a firm called HDR who conducted the study, and really the purpose of it was to see whether we had a protective watershed, and give us some information on how we could comply with the Safe Drinking Water Act, and the Surface Water Treatment Rule, the filtration rule.

2.0

That ended up being an evaluation of the Truckee River corridor from a water quality and from a risk perspective from Tahoe City down to the intakes of our water treatment plants.

I will have to find the report. I will make copies of it and get it to you. I think that could be, even though little bit dated, it's probably a pretty good foundation for possibly this committee's work.

MS. SUSAN LYNN: I agree. Also, Mike Goodwin did one for Washoe County for the tributaries.

MR. MICHAEL CAMERON: I keep wanting to sort of shape out the agenda for the next meeting. I think that would be great, if we had the materials that you're talking about, Ron, and then we had a discussion, we could certainly spend an hour on it, but at least getting our feet wet on the subject matter.

MR. JERRY PURDY: I'd like to suggest: One blessed thing about our Truckee River is it's been studied to death. You don't have to go too far to find a book on anything you want.

2.2

This one was done in May, 2003, by the Regional Water Planning Commission, it was done by Water Resources, the University, and the Water Conservation District. It has all of the channels in here, and it's color coded by what's extreme, what's bad, and it's got tables indicating which are the most severe and extreme things that should be addressed first, second and third.

The reason it was sitting on a shelf was there was never any money to implement it. And the person who is kind of responsible for that over at the county is Mike Dewittmer. He's the Senior Hydrologist, and you might want to invite him by for just a summary to whip through it, not to drag us through the chapter and verse, but snap, snap, snap, and then I think we would be up to speed.

Because we don't have to invent the wheel.

It's all prioritized here, south of Reno and -- well,

I'll pass the book around and you can thumb through

it.

MR. CHRIS COBB: I'd like to get a copy of 1 2 yours too. 3 MR. RON PENROSE: Yes, I will just have to 4 find it, but we have it out there. 5 MR. MICHAEL CAMERON: I'm going to ask Bill, because of your work on the Cord Foundation, as 6 7 well as with the Wildlife Commissioners, if you'd be willing to give us your thoughts at the next meeting 8 9 on -- just your advice on how a new public foundation 10 like this ought to get started. I'm sure you have 11 lessons that we would benefit from. 12 MR. BILL BRADLEY: It's a challenge, I'll And I don't think you want to restrict it 13 tell vou. too much. There's going to be nine strong 14 15 personalities in this room, they all feel strongly 16 about things. 17 And the waiting may work. We don't use 18 waiting factors on either -- I'll tell you, our two 19 charges at the Wildlife Foundation was: To promote, 20 protect and promulgate wildlife. And our charge on 21 the Cord Foundation is: To promote mankind. So those are about as broad as you can get. 22

earlier as I was looking at this charge, and thinking:

And I was actually thinking about that a little

23

```
1
     Well, you do have to be careful with your biases.
                                                         But
 2
     I don't think there is any magic rule. I'll tell you,
 3
     it's going to take consensus building in these
 4
     meetings, and I'm not an engineer, and I don't know
 5
     how to -- We seem to do it all right, although I can
 6
     tell you neither of the committees nine members.
 7
                MS. JANET CARSON: They're smaller or
 8
     bigger?
 9
                MR. BILL BRADLEY: They're much smaller.
10
     So it's going to take a vote of five to finally
     approve something. And I hate to make it too
11
12
     mathematical, to be honest with you.
13
                MS. SUSAN LYNN: I would rather do some
14
     consensus building, if we can.
15
                MS. JANET CARSON: Do you have any kind of
     score sheet with criteria and waiting?
16
17
                MR. BILL BRADLEY: No, we look at the
18
     history of the entity, we look at the Heritage
19
     Foundation within the Department of Wildlife. What we
20
     have been frustrated by, frankly, is it all seems to
21
     come from agency personnel. We don't get enough
22
     private input.
23
                And one of the things I feel is very
24
     important, as I mentioned earlier, is meeting with our
```

```
public relations team to get public involvement and
1
2
     buy-in.
 3
                MS. SUSAN LYNN: Ron, put that on the
 4
     agenda.
                MS. JANET CARSON: We need to decide soon
 5
     what our process is going to be for selecting
 6
 7
     recipients for deciding, you know, we can't fully fund
8
     them, but we might half fund them because we want to
9
     do this other thing.
10
                I mean, I'm an engineer too, so I think
     there's got to be some methodology.
11
12
                MR. MICHAEL CAMERON: It seems like, then,
13
     we have both a substantive -- we have learning as a
14
     group on the substance and subject matter of the
1.5
     watershed and the Truckee River. We have to become a
16
     group on that.
17
                I think Jerry is right, the knowledge is
18
     out there, we just have to figure out a way to
19
     assimilate it into our group.
20
                The second part is that we also have to
21
     learn how to function as a group and make decisions.
22
                Those seem like, for our next meeting, we
23
     could have agenda topics for both. Ron, where you
```

have Community Foundation presentation up there, and I

```
wonder if -- we have several elements for that, which
1
     is that we want the Community Foundation to talk to us
2
 3
     about their role and how they see themselves fitting
 4
     into this; but I think there's more than just that.
                I would like -- and Bill, if you'd be
 5
     willing, to maybe again offer some points --
 6
 7
                MR. BILL BRADLEY: I'd be happy to.
 8
     bring the criteria from the Cord Foundation, which has
     very broad criteria, but the Heritage Foundation has a
 9
     little more specific criteria and application.
10
                But I'll tell you: One of the things that
11
12
     initially separates the wheat from the chaff is the
13
     501(c)3 designation. You're not going to get every
     Tom, Dick and Sally in here asking for money because
14
     of that need to qualify for 501(c)3.
15
                Then the other thing that you take a look
16
17
     at is really the makeup of the 501(c)3: Are they
18
     financially strong, do they have good leadership, can
19
     they initiate and carry through a project?
20
     going to, at least in the short time we have, be a
     factor.
2.1
2.2
                And I'll tell you, whether it's $50,000 or
23
     $340,000, that's not going to go very far in
24
     promoting, protecting this watershed.
```

MR. MICHAEL CAMERON: That's why I think we bleed back into the substance, and what does it mean to have \$340,000 or a million dollars a year for us?

If that's what you've got, how do you make the best use of that money?

MR. BILL BRADLEY: That's why I was asking about the grants. But we have \$340,000, and we have to identify those projects that will fit within that in the next six months.

MR. JERRY PURDY: I was going to share one. We have this \$340,000, and there's a tendency to think: Wow, let's a find a project, a project we can spend that money on. But one approach you might be able to do is to spend some of that money on putting together a good presentation that can be presented to the community to get supplemental funding and shoot it on back to Washington for a grant and so forth, rather than try to come up with concrete and steel to do some particular thing, or farm out that money.

I think we should try to use a portion of that to pay for a professional staff to put together a good proposal of our recommendations, so we have a shot at selling it to somebody, the city, the county, or shoot it back to Washington, what have you.

MR. CRAIG GODBOUT: Actually last night at 1 our -- I attended a Board meeting for Washoe/Storey 2 Conservation District as an observer to get my feet 3 4 wet, and currently they have a contract with Kennedy Jenks that's going to be doing funding research, and I 5 have to look at that grant and see when it's due, but 6 that might be very good source to find other -- I 7 8 mean, he's going to be doing the work already, and I'll have to check with the other Board members to see 9 if we can't piggyback on that research. 10 At some point in time it might be 11 advantageous to have one of their Kennedy Jenks 12 13 personnel present that to us. MR. BILL BRADLEY: I'm certain that 14 somebody within TMWA, or the Truckee River 15 16 organization is also looking at the money that Senator 17 Reed got on the --18 MR. MICHAEL CAMERON: Only 200 million. 19 MS. SUSAN LYNN: That has really narrow 20 focus. MR. MICHAEL CAMERON: 21 Still. 22 MR. BILL BRADLEY: Criteria, I am happy to bring in the applications we use in both foundations. 23 And I'm sure the Community Foundation has an 24

application that it uses, and we can use those to create a form for our applicants.

MR. MICHAEL CAMERON: I just think bef

MR. MICHAEL CAMERON: I just think before we decide on a process, it would be great to hear from somebody like Bill, but give us a little bit of a pros and cons on what our choices are, because I don't feel like I know. I wouldn't know a good process if it was put in front of me.

MR. BILL BRADLEY: The first decision you need to make is whether you want to be lobbied.

MR. MICHAEL CAMERON: That's exactly what I need. Talk to us.

MR. BILL BRADLEY: Whether or not you want to be called by people who will be more than happen to take you to lunch to lobby their project, or whether you limit your exposure to those projects in these meetings.

MR. MICHAEL CAMERON: This seems like the stuff we need to talk about.

MS. JANET CARSON: Can you control that?

MR. BILL BRADLEY: Sure you can.

MS. SUSAN LYNN: You can have a bylaw that says there will be no ex-parte communication, and that all communication needs to take place in these public

1 meetings. MS. JANET CARSON: So we need some bylaws. 2 MS. SUSAN LYNN: Well, you don't need 3 bylaws, just principles and procedures. 4 5 MR. BILL BRADLEY: You need just some 6 quiding principles. You can put a little brochure together that says any contact with a committee member 7 8 will result in an ought denial of your --MS. JANET CARSON: 9 Wow. 10 MR. BILL BRADLEY: And that takes care of 11 that. 12 MR. CRAIG GODBOUT: A lot of us wear a lot 13 of hats. We might even be involved in some of the 14 presentations. 15 I'm just throwing it out MR. BILL BRADLEY: 16 for thought. On the one hand, you're right, you do 17 and people come to you and say I really think this is 18 important. And I don't think you want to cut that 19 off. That's a thought: Do you want to be lobbied? 2.0 MS. SYLVIA HARRISON: If I can make a suggestion. It might be useful if Bill and I could 21 22 maybe collaborate on this before the next meeting to 23 give you a list of questions and issues you want to

discuss regarding those protocols.

```
MS. SUSAN LYNN:
1
                MR. MICHAEL CAMERON:
                                      Yes.
2
                MS. SUSAN LYNN: That would be very
3
     helpful.
4
                MR. MICHAEL CAMERON: I don't want to
5
     stumble, and --
 6
                MR. BILL BRADLEY: Well, you are going to.
7
                MR. MICHAEL CAMERON: I mean so badly we
8
9
     can't get up.
                MR. JERRY PURDY: A good technique for some
10
     of these projects to get out to the people is doing a
11
     video. I was involved in a number of those down in
12
     the Owens and different places. It takes about five
13
     grant, ten grand, to go do a video that highlights in
14
     the field all of these particular things they're
15
     thinking about. The group here decides on what
16
17
     particular points you want into that thing, then the
     TMWA guys go out and hire somebody to work up a script
18
     and run it by us and then go do their shots and so
19
20
     forth.
                MR. BILL BRADLEY: You can do those at PSA
21
     on television without cost.
2.2
                                  There are about a dozen
                MR. JERRY PURDY:
23
     different things you can do, like shooting it back to
24
```

Please.

```
Washington to get some grant money from Congress.
1
                MS. SUSAN LYNN: Well, it seems like that
2
     should come under the PR discussion, probably.
3
                MS. JANET CARSON: Another thing, Sylvia,
4
     you mentioned a while you ago where we could just use
5
     Robert's Rules of Order. But we have to make a
6
     decision, don't we, about how we're operating?
7
8
                MS. SYLVIA HARRISON: Yes.
                MS. JANET CARSON: Is that the best one?
 9
                MR. CHRIS COBB: Adopt that for now and see
10
     if it works.
11
                MR. BILL BRADLEY: They have a little book,
12
     but it's awful.
13
                MR. CHRIS COBB: Did you get the abridged
14
     version?
15
                MR. BILL BRADLEY: It's not too bad.
16
                MS. SUSAN LYNN: I'd really like to try and
17
     reach consensus.
18
                MS. SYLVIA HARRISON: The only thing you
19
     need to do is to, I would suggest, that at some point
20
     when you're actually taking action, making decisions,
2.1
     that you have some formality to the process, so that
22
     you have a quorum and a vote that can be recorded,
23
     because otherwise in the Open meeting law, questions
24
```

```
Have you really taken an action? Other than
1
     are:
     that, the sky is the limit as far as what you want to
2
3
     do.
                MR. BILL BRADLEY: But it has to remain
4
5
     fun.
                MS. SUSAN LYNN: We take ourselves way too
6
     serious.
7
                MS. SYLVIA HARRISON: We have to kind of
8
     stay within hollering distance of the agenda, too.
9
                MS. SUSAN LYNN: Exactly.
10
                MR. RON PENROSE: Shall we move on?
11
                MR. MICHAEL CAMERON: Yes.
12
                MR. RON PENROSE: In terms of the agenda, I
13
     have some items here, and what I'll do is I can draft
14
     them up, put together a draft agenda, e-mail it to you
15
     for your comment, and then we can go ahead and put
16
     together a final agenda for next meeting. Would that
17
18
     be good?
                We're going to meet on Tuesday the 18th,
19
     January 18th, at 9:00 a.m., and we will provide lunch.
20
                MS. JANET CARSON: Location to be
21
2.2
     announced?
                MR. RON PENROSE: Location to be announced.
23
                And now I think we're basically down to the
24
```

```
MR. JERRY PURDY: Before we go, let's let
2
     the poor guy from the University speak.
3
                MR. MICHAEL CAMERON: On the agenda, again
4
     I am under assumption that we're going to use the
5
     better part of the day. As you put it together, as
6
     just a framework or a suggestion, it seems to me we
7
     have actually three main topics for the day, and in no
8
     particular order, I don't know which is the right one,
9
     but involving the public. So there is both building
10
     public support, but also how we reach out.
11
                Becoming a successful foundation, which
12
     included all of the things like how we operate,
13
     criteria, project selection, those kinds of things.
14
                And then the third one is sort of watershed
15
     protection for the Truckee River.
16
                So just again as a suggestion, a way to
17
18
     group and separate the day.
                MR. PENROSE: Janet, do you want to kind of
19
     work on a field trip, maybe, for this group?
2.0
                MS. JANET CARSON:
                                    Yes.
                                          It's hard to plan
21
     it in the winter, because you don't know what the
22
     weather is going to do.
23
                MR. PENROSE: Just kind of looking out a
24
```

last item before adjournment, public comment.

ways, maybe February or something?

MR. CHRIS COBB: I've got waders.

MS. JANET CARSON: Let me respond to that with a little bit more information. The field trip I have done in the past, it's two full days. The first day we go up river, and the second day we go down river. And it's a lot of detail, and it's designed for people who need Continuing Ed Credits.

I have also, though, done a tour in the past which was one day, the whole river. Up river before lunch, down river after lunch. Obviously it's much faster, not as many stops. But for this group, given the difficulty of scheduling, I think that might be better, because it increases the chances of everybody being able to participate.

The other good thing about it is since lunch occurs in Reno, some people can only do the morning half, other people can only do the afternoon half. It gives you a little more ability to do that.

I guess I would recommend just a one-day tour. It doesn't have to be all in the same day; it could be broken into a half day on two different dates, depending on the group's availability.

MS. SYLVIA HARRISON: We can also think

2.3

```
about renting a small bus; they are easily available, that fits this size group so everybody can be in the same vehicle.
```

MS. JANET CARSON: That's critical, because so much of the information is exchanged among people in the group.

MS. SYLVIA HARRISON: You just need to make sure you have extra seats to accommodate people who show up in the parking lot. And nobody ever does, but we still need to do that.

MS. SUSAN LYNN: It's on our agenda item for the next meeting?

MR. RON PENROSE: Yes, I have it down there. Okay, public comment?

MR. MIKE COLOPY: My name is Mike Colopy, I work over at the University, and recently I was given a second hat to wear over there, Interim Director of the Academy for the Environment.

about that yet, it's a university-wide effort to try and pull together all the environmental projects on campus, both physical and biological sciences, but as well as economics and humanities and arts and English and history and policy.

And the idea -- I'm going to try to get that program started -- is to try to bring greater cohesion and visibility to the environmental commitments that are already on campus, that many people aren't aware of.

Probably most of you in this room have worked with various university faculty over the years, and one of the things I'm going to try to do while I'm working in that program, is to try to make more visible and understandable the things that we're doing, so that as this body crystallizes its purpose and its mission and how it wants to proceed with its budget, then they are provided a logical nexus for what capacity we have to help you in addressing the kinds of issues we can identify as priorities.

So, I mean, that's my pitch for the institute. Even though I have been sitting here all morning, I'm really not here as a vulture, I'm really here to -- well, sort of -- but I'm really here to try to share information with you folks. That's the one hat I'm wearing.

The other reason I knew about the meeting, is that we have been talking with Lori for many months about a project that we have been developing within my

department. So she had just suggested that we just kind of track the process. So we're ready and willing to try to sell you soap, whenever you're willing to have soap sold.

2.2

The one thing I would say, because I know it's time to quit, is I recently got involved with a working group that's establishing a Tahoe research and science consortium, trying to re-invent how some of that southern Nevada money that's coming up into the Tahoe basin will be spent, how science is going to be conducted, how research priorities are going to be developed and then funded through projects, through both Federal and State, County, whatever agencies.

The key issue up there, and I guess you folks know this, and I'm struggling with it on that body, which is analogous to this body, is for credibility and public support, you need to have a really straightforward, transparent process for establishing research priorities; and then for going about the hard work of figuring out what you can fund with your limited funds.

The problem that's happened -- I've been in the state for four years, I worked in Oregon on the Northwest Forest Plan and other jobs and capacities --

```
and credibility is everything. You know, if there's the perception of a conflict of interest in the allocation of money, you have a problem you will never overcome.
```

1.3

1.5

2.2

That's a lingering problem in the Tahoe basin, with funds that have been allocated to various entities over the years without really a clear process, or competition, and I would just argue:

Regardless of who you fund, that whatever process you ultimately settle on, it be transparent to the potential participants as well as the public. That's the most important thing you could do.

And like I told up at the meeting up there, if UNR can't compete in the Tahoe basin for money and Davis provides the best proposals, I have told them:

All the money ought to go to Davis. And I said: I hope that philosophically feel the same way. And I think that makes all of us better.

And you should have fun, Bill is exactly right. This is a really exciting opportunity, and anything we can do, anything I can do, be happy to do it.

MR. BILL BRADLEY: Thank you.

MR. JERRY PURDY: May I make a public

comment statement?

MS. SYLVIA HARRISON: Sure.

MR. JERRY PURDY: Well, in that book, the most critical particular item was our old friend Shaw Creek up there just off of McCarran Boulevard; it came about because of all of the homes and the golf courses putting water into the dry wash. We've got a cubic foot a second flowing down there in the box culvert that's on the west end of the nursery out there on Fourth Street. And that was the one that puts in 10,000 pounds a day of dissolved solids. We sit here two hours, now we're looking at an 800-pound block.

What I would like to suggest is that you folks go rent us the bus you're talking about, and the next meeting we spend an hour, and we'll run up the canyon -- it just goes up there by the Mormon Church, up Peavine, that sort of thing -- and then you get the good ideas out of this group on how to go at it.

And the way to solve that money thing is we should increase that fee to the developers who are building homes up there. They're all home free now, everybody that's planted a house up there is home free.

But this isn't just a particular problem

```
relative to Shaw Creek up in this area; this is the worst in that book. But it's happening over in Thomas Creek, and it's happening in that big subdivision to the west, the Somerset project. It's a repetitive thing, and it's dumping tons of dissolved solids in, and developers aren't paying the cost on that.

There are no villains, this just hasn't
```

2.1

There are no villains, this just hasn't been brought up and hung on them as a fee to mitigate this sort of thing. And we could get Dan Dragon to go with us, he's the guy that showed me this in the pictures, and shoot our hour or two and take a run in the bus, and I can help on that.

MR. CHRIS COBB: Do you suspect that's from construction activity?

MR. JERRY PURDY: It's from the golf courses, golf flow, from the houses.

MR. CHRIS COBB: Right, but is it permanent, ongoing, or is it from construction activity?

MR. JERRY PURDY: No, permanent, ongoing.

It was a dry wash, and now it's filling up because of so much dissolved solids in there. It's moving the vegetation.

MR. RON PENROSE: Maybe we need somebody

from NDEP to talk about discharges to the Truckee River.

2.1

MR. JERRY PURDY: Why not deal with this one issue at a local level, and then we can branch out and get some of the A-team guys to talk about it. If we get into a philosophical thing, we'll burn up a lot of our time.

This needs action, because every hour, you know --

MS. SUSAN LYNN: I think it's a matter of science, and I think it's a matter of TMBLs, and I frankly would like to hear this from them, because that's the science which we rely on, and --

MR. CHRIS COBB: Don't we want to at least,
I think, get through this before we get into something
of that nature? I'm not trying to table it longer, I
understand every hour, but I think our next meeting,
and if we can at least hammer these out, then we will
have the opportunity to start listening to their
project, listening to this project.

I guess that's another concern I have. You know, we've all been appointed by an entity here, but like Dave said, he's hoping we can come together as a consensus, what's the best for the Truckee River.

I guess: Is there going to be concern with Open Meeting Law? Are we bringing the projects or asking our representative to bring the project? I guess I get a little concerned when we start bringing them, because I know where I work, I may end up working on it, and I don't feel comfortable. Maybe that's my level of comfort.

2.0

2.2

think that is one of the things you're going to have to address; and that is, each one of you has a connection to a group or a cause or an entity, and you're going to have to wrestle with that a little bit and make your own internal rules on how you want to deal with that, whether you want to recuse Mike from consideration of a major conservancy project, or you probably want to develop something like that as opposed to disqualifying any of the entities you have any involvement in. So you're just going to have to just wrestle with that a little but internally.

I don't really see any reason why you shouldn't develop your own checklist of projects that you would like to see implemented. You're perfectly free to do that. You can approach things from that end as well, and you can say: These are some problems

that need to be solved on the river, here are some groups that may want to adopt this cause.

1.

MR. MICHAEL CAMERON: This is going to turn into a long meeting next time, but I actually would love to hear from folks -- I mean, Jerry has got things he knows about, he's already putting them on the table, and so do you folks have expertise. And I would love to learn more. I mean, some folks I know better, Susan and I work together frequently. But how do we all view this river?

I wouldn't mind having some time just for that kind of discussion among ourselves, because I do think our collective vision of both the problem and the opportunity is: We're going to operate a lot better if we know where we're coming from individually, professionally, and creating some time for that underneath this discussion next time.

Having a briefing on these two substantive reports, I think would be really helpful, and then just having enough time for discussion among us on the river, as we haven't gotten to that today.

MR. RON PENROSE: Jerry, in regards to that specific problem there by Chalk Bluff Canyon, I'm sure that's a critical thing to take a look at, but I think

```
we really have to establish -- you should establish
your criteria, your protocol, how are we going to
operate, before you start looking at a specific
project.
```

MR. JERRY PURDY: Sure.

1

2

14

15

16

17

18

19

20

21

22

23

24

MR. RON PENROSE: And that project could flow to the top of the list, but I think you really have to define this first before you start evaluating projects.

MR. JERRY PURDY: I wonder if our attorney could give us a little help, put down some thoughts on how we could bring projects forward and what we can talk on?

MR. BILL BRADLEY: I'll suggest something to you. As a member of the committee, it's better, I think, to have representatives outside of us come to this. You get too vested in an idea, and it's difficult to build consensus.

You mentioned some people there that have significant concern with that particular plan, and I think you'd find yourself in a better position bringing those people in to make that presentation, so you don't get so emotionally tied to it, then all of a sudden you're painting yourself in a corner.

```
MR. JERRY PURDY: Yes, that's what I was
1
               Probably a couple of those hydrologists
2
     thinking.
 3
     could --
                MR. BILL BRADLEY: Right. You want to stay
 4
     one step above that, to make sure you don't get too --
 5
     I mean, you have to be careful about it.
 6
                MS. JANET CARSON: I mean, I can't detach
 7
 8
     myself from the bikeway. And Mike Cameron can't
     detach himself from the McCarran --
 9
                MR. CHRIS COBB: But I think that's part of
10
     us developing our criteria so that hopefully we can
11
12
     come to a consensus, what will best serve the Truckee
13
     River.
                MS. SYLVIA HARRISON: Just remember what I
14
     said: You guys don't want shovels in your hands, as
15
16
     this group.
17
                MR. MICHAEL CAMERON: I want to invite
18
     folks, before you go, several of the non-profits, are
     hosting some workshops that are very timely to this
19
20
         What are all the issues on the river. It's on
     Friday, December 16th, from 9:00 to noon. It's a
21
22
     workshop on water quality.
                And these are workshops that really are
2.3
24
     intended to go two inches deep, and they are a mile
```

```
wide, but we're trying to get our arms around all of
1
2
     the issues.
                It's at Washoe County Department of Water
3
     Resources, which is just up here on Energy Way inside
4
     the Dermody kingdom.
5
                There are also workshops on January 6th and
 6
     7th, a Thursday, Friday, on habitat, and very related
 7
     to watershed health issues. Also 9:00 to noon, Washoe
8
 9
     County Water Resources.
                If we get e-mails for this group, I would
10
     be happy to send you a more detailed announcement.
11
                MR. PENROSE: Okay, I think we have come to
12
     the end here. Can I have a motion for adjournment?
13
                MR. BILL BRADLEY: I move that we adjourn.
14
                MR. CRAIG GODBOUT: Second.
15
                MR. PENROSE: Everyone in favor?
16
17
                (They all say aye.)
                              1111111
18
19
20
