

TRUCKEE RIVER FUND

Enhancing and protecting our water resources

GRANT PRIORITIES

Truckee Meadows Water Authority (TMWA) recommends that the Truckee River Fund (TRF) Advisory Committee (the “Committee”) give preference to well-supported, clearly drafted grant requests that consider substantial benefits to TMWA customers for projects and programs that mitigate substantial threats to water quality and the watershed, particularly those threats upstream or nearby water treatment and hydroelectric plant intakes.

- i. **Aquatic Invasive Species (AIS):** Projects/Programs that support the prevention or control of aquatic invasive species in the mainstem Truckee River and other tributaries, and water bodies in the Truckee River system.
- ii. **Watershed Improvements:** Projects that reduce erosion or sediment, suspended solids, or total dissolved solids (TDS) discharges, nutrients, industrial contaminants, or bacterial pollutants to the River. Projects or programs that are located within 303d (impaired waters) and total maximum daily load (TMDL) sections of the River should be considered, both in California and Nevada. Innovative techniques should be encouraged. The following link identifies impaired sections of the river and its tributaries: <https://mywaterway.epa.gov/>.
- iii. **Local Stormwater Improvements:** Projects that demonstrably mitigate stormwater run-off due to urbanization of the local watershed. Priority should be given to improvement projects in close proximity to TMWA’s water supply intakes and canals that will improve reliability and protect the quality of the community’s municipal water supply.
- iv. **Re-Forestation and Re-Vegetation Projects:** Projects to restore forest and upland areas damaged by fire and historical logging operations, and to improve watershed resiliency in drought situations. Projects/programs in this category should be given a high priority due to the urbanization of the watershed and the increased susceptibility of the urban and suburban watershed to wildfire.
- v. **Support to Rehabilitation of Local Tributary Creeks and Drainage Courses:** Projects to support water quality improvement in creeks and tributaries to the Truckee River.
- vi. **Stewardship and Environmental Awareness:** Support to clean-up programs and the development and implementation of educational programs relative to water, water quality, and watershed protection that do not fall clearly into one of the above-mentioned categories.

Notes:

- **For proposals related to weed control/eradication, contact Lauren Sgandurra at the Community Foundation of Northern Nevada for additional criteria at laurens@nevadafund.org.**
